## EDUCATION

**Alabama A&M University, Huntsville, AL**

**Expected Graduation: May 2028**

Bachelor of Science in Computer Science

**GPA: 3.61**

**Relevant Coursework:** Intro to Computer and Ethics - Python(Taught by Google in Residence), Computer Science Programming I, II (C++), Intro Java Programming(Java), Calculus I, Calculus II

**Honors:** AAMU Full Merit Scholarship, EICOP 2025 Finalist

## SKILLS

**Programming Languages:** Python, Java, JavaScript, C++, UX/UI, HTML, CSS

**Software/Frameworks:** Git/GitHub, React.js, Adobe Illustrator, Photoshop, CorelDraw, Adobe XD, Visual Design

**Soft Skills:** Teamwork, Communication, Leadership, Problem Solving, Time Management, Critical Thinking

## WORK EXPERIENCE

**Academic Teaching Assistant, Alabama A&M University**

**January 2025 - Present**

- Currently teaching **C++ programming, Calculus I, and Python**, providing personalized support to enhance student understanding and academic success.
- Developing and delivering interactive lessons, tailored practice materials, and hands-on problem-solving sessions to engage students effectively.
- Mentoring students in foundational and advanced concepts, fostering critical thinking and improving performance across diverse learning styles.

**Cloud Computing Intern, Verisk - Nepal**

**January 2023 – March 2023**

- Developed and implemented a cloud-based IoT monitoring system using **Python** and **C++**, enhancing real-time data collection and improving data processing efficiency by 30%.
- Created a responsive web-based dashboard with **HTML, CSS, JavaScript**, improving user interaction and usability by 20%.
- Optimized system performance through testing and debugging, reducing latency by 25% and enhancing system reliability.

## PROJECTS

**Smart To-Do List, Python, JavaScript**

**August 2024**

- Developed a to-do list application using **Python**, allowing users to manage tasks with adding, editing, and deleting items.
- Designed an intuitive user interface with **JavaScript**, providing seamless task management with task prioritization and deadlines.
- Ensured data persistence by saving tasks to a local text file, allowing users to keep their to-do list updated.

**Tic-Tac-Toe Game, C++**

**May 2024**

- Developed a console-based Tic-Tac-Toe game in **C++** allowing two players to play against each other with an interactive user interface.
- Implemented game logic including win detection, draw conditions, and turn-based play, ensuring smooth and engaging gameplay.
- Enhanced user experience by adding features like replay options, customizable board size, and clear instructions, making the game user-friendly.

**Recipe Finder App, React.js**

**February 2024**

- Created a recipe finder application using **React.js**, where users can search for recipes based on ingredients or dish names.
- Utilized a **JSON** file to manage recipe data, allowing for easy retrieval and display of recipes with ingredients and instructions.
- Implemented responsive design to ensure accessibility on desktop and mobile, with features like search suggestions and filtering by cuisine or meal type.

## LEADERSHIP / COMMUNITY SERVICE PROJECT

**Web Dev Bootcamp, Rockvale Secondary Academy**

**May 2023**

- Organized and led a month-long "Web Dev Bootcamp" at Rockvale Secondary Academy, introducing 100 high school students to web development basics.
- Designed and delivered a comprehensive curriculum covering **HTML, CSS, JavaScript**, and an introduction to responsive design and basic **React.js** concepts.
