EDUCATION

Alabama A&M University, Huntsville, AL

Expected Graduation: May 2028

Bachelor of Science in Computer Science

GPA: 3.80

Relevant Coursework: Intro to Computer and Ethics - Python(Taught by Google in Residence), Computer Science Programming I, II (C++), Intro Java Programming(Java), Calculus I, Calculus II, Data Structures

Honors: AAMU Full Merit Scholarship, EICOP 2025 Finalist

SKILLS

Programming Languages: Python, Java, JavaScript, C++, UX/UI, HTML, CSS, C#, SQL (PostgreSQL, MySQL)

Software/Frameworks: Git/GitHub, React.js, Firebase, Docker, TensorFlow, PyTorch, Adobe Illustrator, CorelDraw

CS Fundamentals: OOP, Data Structures & Algorithms, OS, Complexity Analysis

AI/ML, Optimization Cloud: ML (TensorFlow), NLP, Deep Learning, Optimization, AWS, GCP, Microservices

WORK EXPERIENCE

Academic Teaching Assistant, Alabama A&M University

January 2025 - Present

- Currently teaching **C++ programming, Calculus I, and Python**, providing personalized support to enhance student understanding and academic success.
- Developing and delivering interactive lessons, tailored practice materials, and hands-on problem-solving sessions to engage students effectively.
- Conducted **live programming demos** and **hands-on coding projects** that increased student engagement and success rates.

Cloud Computing Intern, Verisk - Nepal

January 2023 – March 2023

- Developed and implemented a cloud-based IoT monitoring system using **Python** and **C++**, enhancing real-time data collection and improving data processing efficiency by 30%.
- Created a responsive web-based dashboard with **HTML, CSS, JavaScript**, improving user interaction and usability by 20%.
- Optimized system performance through testing and debugging, reducing latency by 25% and enhancing system reliability.

PROJECTS

Smart To-Do List, Python, JavaScript

August 2024

- Developed a to-do list application using **Python**, allowing users to manage tasks with adding, editing, and deleting items.
- Designed an intuitive user interface with **JavaScript**, providing seamless task management with task prioritization and deadlines.
- Designed a **JavaScript-powered user interface** that provides an interactive experience to manage daily tasks.

Unity-Based 2D Game, C++, C#

May 2024

- Developed a **2D platformer game** in **Unity**, utilizing **C#** for game logic and **C++** for performance-optimized physics calculations.
- Integrated AI-controlled enemies, collision detection, and movement mechanics using **C++** for backend efficiency and **C#** for game scripting.
- Designed and implemented a **power-up system, score tracking, and interactive UI** to enhance gameplay experience.

Recipe Finder App, React.js

February 2024

- Developed a **React-based recipe search platform** that dynamically fetches recipes using **JSON-based data storage**.
- Implemented **real-time filtering and search suggestions**, enhancing user experience and efficiency.
- Designed **responsive UI/UX** for mobile and web using **CSS Grid, Flexbox, and React components**.

LEADERSHIP / COMMUNITY SERVICE PROJECT

Web Dev Bootcamp, Rockvale Secondary Academy

May 2023

- Organized and led a month-long "Web Dev Bootcamp" at Rockvale Secondary Academy, introducing 100 high school students to web development basics.
- Designed and delivered a comprehensive curriculum covering **HTML, CSS, JavaScript**, and an introduction to responsive design and basic **React.js** concepts.
